

POLYMATH Installation Steps for All Windows Operating Systems:

1. Close all other programs before the installation of POLYMATH 5.1.
2. Initiate install by executing PM5-1DemoSetup.exe in this subdirectory.
3. You may be asked to restart your computer up to two times during the installation process. Please continue with the installation after the restart.

Execution of Polymath 5.1:

The installation should result in a POLYMATH icon on your desktop. The program will be located in the subdirectory that you indicated during installation.

Removal of Polymath 5.1:

This program can be removed using the Control Panel and the Add/Remove Programs option.
